

Cozy Haven Stay – UI Documentation

Submitted by:

Monish Coumar S

Java & React Batch 2

Overview:

Cozy Haven Stay is a SaaS-based hotel booking web application developed as a case study. The platform is designed with three distinct user portals, each tailored to the unique needs of its stakeholders.

Elevate Your Stay

UI Design to Implementation

The user interface for Cozy Haven Stay was initially conceptualized and designed in Figma, and later translated into a fully functional front-end using React.js for seamless responsiveness and real-world integration.
